#### MR. COLER AND THE DEBT LIMIT

HE HAS NOTHING TO SAY REGARDING THE INCREASED ASSESSED VALUATION, BUT HOPES THE MATTER MAY BE STRAIGHTENED OUT.

A Tribune reporter visited Controller Coler, in Brooklyn last night and called his attention a contention that has been advanced to the effect that the new assessed valuation of city property for this year went into effect on May 1, that the city debt limit should be computed from this valuaand that, as it is many millions larger than that on which the Controller based his figures, the is many millions of dollars within cluded in the indebtedness. The assessment this year is much larger than that of last year.

Year is much larger than that of last year.

"I hope that we are within the debt limit," said Mr. Coler, but I don't know that I care to say anything about the matter of which you speak until I have seen the figures of the assessment. This whole thing is merely a question of law, and my figures were made under the decision of the Corporation tounsel. Anything that will bring to an end the present condition of affairs will be done so far as lies within my power."

"Do you understand, Mr. Coler, that this year's assessment is much larger than that of last year?"

"I don't know what the increase is."

"Is it your understanding that this year's assessment went into effect on May !?"

"That is a law point and must be passed upon by the Corporation Counsel. I want to straighten this matter in any way that it can be done."

Some of the skirts come in the new circular shape, while others have the flounce effect and the slik them full.

This manufacturer had intended that these suits would fetch \$12 to \$35, but the lot price that we paid lets us sell them at
